

There's no denying the potential the Cloud has to enhance your business. But there's a lot of confusion around the Cloud. From Office 365, Enterprise Mobility and Azure, the Cloud is changing the way we work at an incredible pace and it's often hard to keep up.

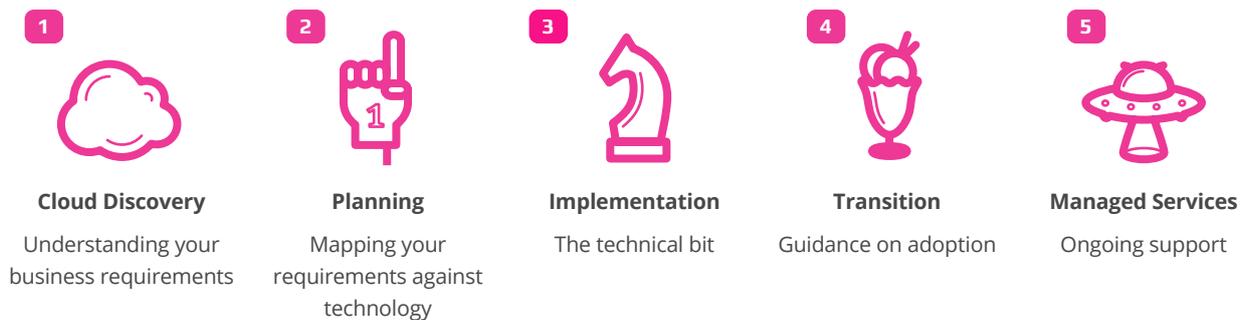

That's where we come in... **Ready. Set. Cloud.** provides enterprises with a comprehensive view of services and engagement options which are designed to help you transition to the Cloud. It brings together ClearPeople's award-winning expertise, experience and IP, along with a tried and tested methodology which effectively focuses on delivering customer goals for Cloud readiness.

What does **Ready. Set. Cloud.** look like?

Ready. Set. Cloud. isn't an entirely technical exercise. Sure, it's driven by IT but the overall business benefits are important to the entire Board.

ClearPeople's simple approach is outlined below and begins from strategizing what the Cloud can do for you right through to implementation and support.

We focus on **your business**, it's not all technical.

Let's get started

Implementation is a while away yet, first we need to get up to speed on what your business needs and what you already have in place.

Therefore, to get you started on **Ready. Set. Cloud.** we've put together two initial engagement options based upon your current state of play in adopting the Cloud. If you've no idea where to start, then our **Cloud Strategy Masterclass** is for you. For those who are better versed in the Cloud, it's time to jump on board with our **Cloud Readiness Assessment** and delve into your specific business requirements.

Cloud Strategy Masterclass

You know you want the Cloud, but don't quite know what to do or how to get started. If this sounds like you, then the first step in **Ready. Set. Cloud.** is our Cloud Strategy Masterclass. In a 1 Day workshop, our team of consultants will provide you with advice on what the Cloud can do for your business. Here you'll understand how to leverage its full capabilities as we help you to **develop a business case and create a roadmap and timeline** to get you Cloud-ready as quickly and effectively as possible. Following this workshop, you'll be provided with a **high-level report** that we'll present back to you that outlines your strategy for the future.

Cloud Readiness Assessment

You've already made the first step in **Ready. Set. Cloud.** but now it's time to get to know the technology and workloads that are best suited to meet your organisation's specific needs and get you on the road to digital transformation. With our Cloud Readiness Assessment, we'll help you understand:

- the business benefits of transitioning to the Cloud
- your organisation's technical feasibility
- the best approach to Cloud adoption
- the cost benefits and ROI
- the likely timescales for implementation

This step in your Discovery is designed to help you define your **personal cloud strategy**. Driven by our consultants, we'll provide an **audit of the current systems** that are in place followed by a **technical planning session** to understand high level feasibility. The end result will be a **playback session** where we deliver a cloud strategy bespoke to your organisation's specific needs. Helping you to realise the potential of the Cloud, our consultants are there to guide you on your Cloud Discovery and will be readily available to advise you on the best approach to implement your strategy.

Why ClearPeople?

You can be confident that by working with ClearPeople you will get the best advice, experience and calibre required to take the first step into your Cloud journey. We are the first Microsoft UK Partner to be awarded Cloud Platform Gold Competency for Microsoft Azure which demonstrates our best-in-class capabilities in delivering Cloud based solutions to UK Enterprises. We have used our expertise, knowledge, IP and experience to help our customers identify the best and most cost effective way to use the Cloud successfully. Instead you can focus on delighting your end users and seeing value from our solutions and services. By working with our consultants, you can be assured that we will bring together best in class capability and solutions in Cloud Services to enhance your business's productivity and efficiencies.
